## SUMMARY

Passionate Junior Web Developer skilled in both front-end and back-end development. Proficient in web technologies, eager to learn new frameworks, and dedicated to delivering high-quality, user-friendly digital experiences. Strong communication skills with meticulous attention to detail. I made many projects some are listed here

## EDUCATION

### BS in Information Technology

International Islamic University Islamabad

09/2020 - 09/2024 Islamabad, Pakistan

GPA

3.22 / 4.0

## EXPERIENCE

### Front end Developer

Troon Technologies

10/2024 - Present Islamabad, Pakistan

Working as a Front End Developer and Gaining practical experience in Front End development

- As a front-end developer at Troon Technologies, I develop various projects using languages and tools such as React.js, HTML, CSS, Bootstrap, Tailwind, and JavaScript. I am skilled in API integration, ensuring seamless data flow between front-end and back-end services.
- I also manage code versioning and collaboration on GitHub, maintaining clean and efficient code across all projects.
- I implement responsive design principles to ensure optimal user experiences across a wide range of devices and screen sizes, utilizing frameworks like Bootstrap and Tailwind CSS.
- I focus on optimizing front-end performance by employing techniques such as code splitting, lazy loading, and efficient state management to enhance loading times and overall application responsiveness.
- I collaborate closely with UX/UI designers and back-end developers, utilizing version control systems like Git to streamline development workflows and maintain code integrity throughout the project lifecycle.

### Full Stack Developer Intern

OCTALOOP TECHNOLOGIES

08/2023 - 01/2024 Islamabad, Pakistan

Gained practical experience in Full Stack development

- Developed and maintained code for four client websites primarily using HTML, CSS, JavaScript, React.js, Bootstrap, Node.js, Express.js, MongoDB, GitHub, Postman, REST API, and API integration.
  - Collaborated with a team of four developers, gaining valuable teamwork experience.
  - I implemented user authentication and authorization features using tools like JWT and OAuth, ensuring robust security measures to protect user data and maintain application integrity.
  - I participated in Agile development methodologies, including sprint planning and daily stand-ups, to enhance team collaboration and deliver features iteratively based on client feedback.

## PROJECTS

### ToeFit Ecommerce Store

<https://github.com/abubakar10/ToeFit>

I developed an e-commerce site called ToeFit using the MERN stack, focusing on a user-friendly interface and a seamless shopping experience.

- This project included features such as product listings, a shopping cart, secure payment processing, and robust login functionality to ensure secure user access and personalized experiences.

### Portfolio

<https://github.com/abubakar10/my-portfolio-reactJs>

Portfolio using Reactjs

- I created my portfolio using React.js, showcasing my projects and skills in a visually appealing and interactive format. The responsive design ensures optimal viewing across various devices, allowing potential employers to easily navigate my work.

### Falcon Dispatch Services

<https://github.com/abubakar10/Dispatching-services-react>

Dispatching Services Website

- I developed a dispatching services website using React.js, emphasizing efficiency and user-friendly navigation for seamless service booking.

### Product Card

<https://github.com/abubakar10/Product-crud-reactjs->

Product Card With Full CRUD

- I created a product card using React.js that supports full CRUD operations, allowing users to create, read, update, and delete product information seamlessly.
